

## Virtual Care & Telehealth Platform

From demanding 911 call centers and on-scene emergency care, to in-home therapy and routine virtual care, HealthCall Telehealth service provides fully integrated HIPAA-compliant, high quality live audio and video for up to four people with universal device support.

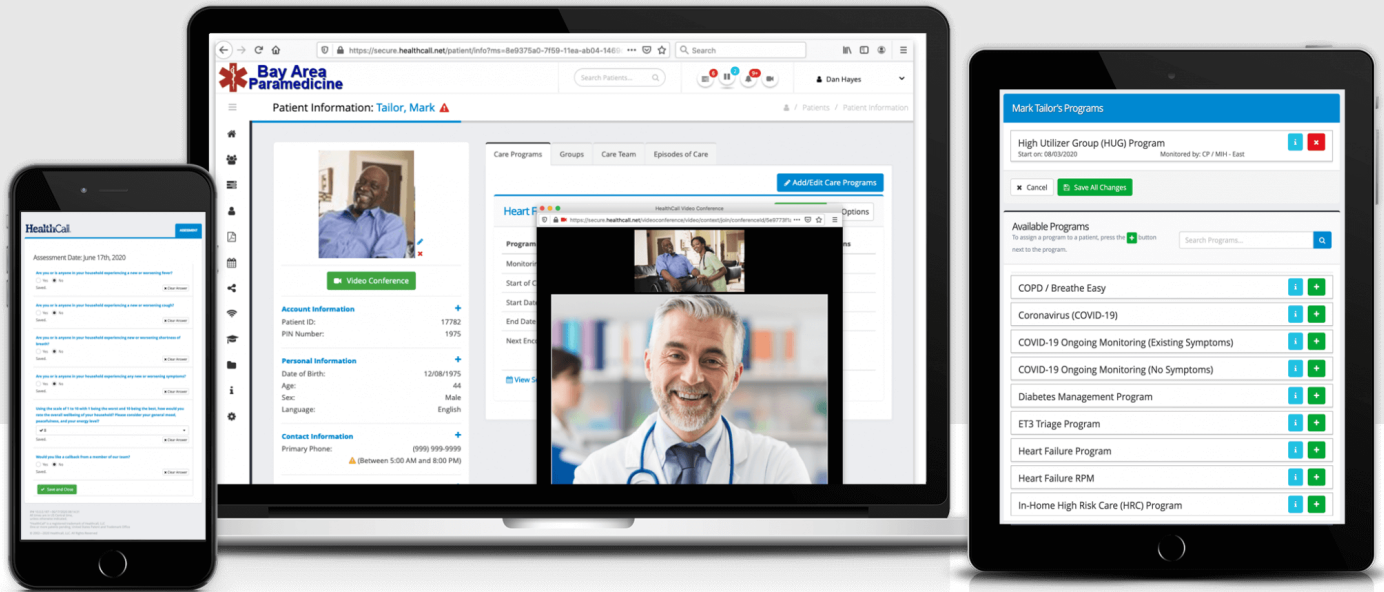

Easy to launch video sessions directly within the HealthCall platform to invite patients, care providers and others. Recipients simply click on the secure link to join the video conference. No apps to install, no registration and no licensing make HealthCall video easy, secure and highly scalable.

Like all HealthCall products, our Telehealth solutions are fully integrated, which streamlines documentation and enables automated billing. Participants, time, duration,

encounter notes, CPT codes, and assessment data can be automatically exported for billing.

- ✓ Proven under demanding scenarios
- ✓ High-quality, real-time audio & video
- ✓ Easy, one-click to join (no app, no registration, no license)
- ✓ Universal Device Support (smart phones, tablets, laptops, etc.)
- ✓ Up to four participants (supports multiple use-cases)
- ✓ Complete analytics, reporting, & tracking
- ✓ HIPAA Compliant, end-to-end encryption (links cannot be reused)
- ✓ Fully integrated (seamless automation, reduces billing errors, easy documentation)

# Traditional Care and Well Beyond

When being there isn't best, HealthCall Secure Telehealth video enables care professionals to deliver advanced care anywhere, connecting patients and care teams with one click across most devices and smartphones.

With literally hundreds of video options flooding the market, it is important to find a partner who has a track record of success. Our third-generation Telehealth video is one-click easy and fully integrated within the HealthCall clinical management platform.

Developed over nearly two decades, we have special expertise in ensuring you have quick access to all the tools you need to provide complete care from virtually anywhere.

## It's Personal

The intuitive HealthCall video service enables virtualized care with your personal touch. The technology is transparent. You and your patients can focus on what is most important, no apps to download, no licenses to renew, and no registration.

## Highly Scalable

Our innovative HealthCall Secure Telehealth platform is taking care to a new level. With a single click, providers can securely connect with patients to deliver complete care from anywhere. As remote care becomes increasingly vital in today's environment, HealthCall Telehealth solutions delivers a secure and versatile way to connect with single-click simplicity. Our innovative platform enables providers to deliver screening and automated follow-up in one click.

## Fully Integrated

HealthCall Telehealth Solutions are fully integrated enabling documentation and reporting/ analytics, billing for multiple use cases including:

- ✓ Community Care
- ✓ Chronic Care Management
- ✓ Transitional Care Management
- ✓ Corporate Wellness
- ✓ Behavioral Health
- ✓ Patient enrollment
